

Environmentally Friendly Foam

Gaia Mat /Gaia Sport

NOH-45 & NOH-67

Are you tired of practicing on a toxic PVC or EVA mat?

Currently most exercise mats are made of PVC or EVA foam, a toxic petroleum product. Environmental concerns have brought to the light the devastating effects of PVC and EVA on the environment. Europe has introduced RoHS regulations to combat the environmental effects of heavy metal products. Today Winboss Industrial, the number one manufacturer of rubber foams in Asia, announced immediate availability of the **Environmentally friendly Gaia®** foam.

Gaia® foam represents superior durability, improved performance and is non-toxic. The unique foam structure exhibits excellent shock absorption and is highly flexible foam. Yoga and Pilates should bring you closer to the Earth. No longer will a PVC or EVA mat be a barrier to your meditation and exercise. Our foam is lightweight, soft and warm, without sacrificing durability.

Natural fiber mats can be scratchy, and lack durability, **Gaia®** brings an eco-friendly option that is superior to PVC, EVA and natural weave mats.

Gaia® mat is a newly developed product. Addressing the growing concern for the environment, it is designed especially for replacement of PVC and EVA mats in many fields of application. It does not use CFC's/HCFC's, ozone depleting materials. This Halogen, PVC and Phthalate ester free compound meets RoHS regulations.

Gaia® foam mats are chemical resistant, including petroleum products. By resisting fungus and humidity, weather, heat and cold, they are a take anywhere mat. **Gaia®** foam mats are better for the environment and better for you! Enjoy your workout with a free conscience, breath the clean air around you not the chemicals from your mat and achieve new goals!

Winboss, and **Gaia®** foam are either registered trademarks or trademarks of Winboss Industrial in the United States and/or other countries.

- Pass SGS PVC free / Latex free test, and Meet RoHS regulations.
- Closed cell foam easy to clean.
- Excellent shock absorption.
- Durable.
- Lightweight, softness.
- Multi-functional.
